COCOM Doc. No. 3959B

22nd April, 1960.

COORDINATING COMMITTEE

MEMORANDUM BY THE ITALIAN DELEGATION

REQUEST TO EXPORT BEARINGS TO RUMANIA.

The Italian authorities have received an application to license the export to Rumania of 5 spherical roller bearings covered by Item 1601 and valued at \$7,840.

These bearings are of the catalogue type 12348, having dimensions of 630 x 920 x 212 mm., and are intended for installation on a "blooming" rolling mill. They are embargoed solely because of their size (diameter: 630).

The equipment in question has been requested by the Technoimport in Bucharest.

In view of the very small number of parts and of their use on a rolling mill not covered by Item 1305, the Italian authorities would like to grant the licence requested. They are submitting this case on an ad hoc basis and would be glad if Member Governments would make known their views within the shortest possible time.
